

2. Internal functions

Ada (body)

driverspace_workspace/formal/ds-spark-core/src/ds_buddy_math.adb (line 6)

[function] function Power_Of_Two (Exponent : Block_Size) return Phys_Addr is

driverspace_workspace/formal/ds-spark-core/src/ds_buddy_math.adb (line 11)

[function] function Is_Aligned (Addr : Phys_Addr; Size_Exp : Block_Size) return Boolean is

driverspace_workspace/formal/ds-spark-core/src/ds_buddy_math.adb (line 18)

[function] function Get_Buddy_Address (

driverspace_workspace/formal/ds-spark-core/src/ds_buddy_math.adb (line 31)

[function] function Get_Left_Child_Address (

driverspace_workspace/formal/ds-spark-core/src/ds_buddy_math.adb (line 40)

[function] function Get_Right_Child_Address (

driverspace_workspace/formal/ds-spark-core/src/ds_buddy_math.adb (line 50)

[function] function Safe_Calculate_DMA_End (

kernel_Workspace/kernel/src/policy/ada/policy.adb (line 5)

[function] function Evaluate (Ring : Ring_Id;

kernel_Workspace/kernel/src/policy/ada/policy_c.adb (line 5)

[function] function To_Ring (V : Unsigned_8) return Ring_Id is

kernel_Workspace/kernel/src/policy/ada/policy_c.adb (line 11)

[function] function To_Class (V : Unsigned_8) return Call_Class is

kernel_Workspace/kernel/src/policy/ada/policy_c.adb (line 20)

[function] function policy_evaluate (ring : Unsigned_8;

lib-ada/tg_alloc_buddy.adb (line 16)

[function] function Valid (A : Buddy_Allocator) return Boolean is

lib-ada/tg_alloc_buddy.adb (line 26)

[function] function Used_Pages (A : Buddy_Allocator) return Natural is

lib-ada/tg_alloc_buddy.adb (line 37)

[function] function Free_Pages (A : Buddy_Allocator) return Natural is

lib-ada/tg_alloc_buddy.adb (line 48)

[procedure] procedure Allocate

lib-ada/tg_alloc_buddy.adb (line 107)

[procedure] procedure Free (A : in out Buddy_Allocator; I : Page_Index) is

lib-ada/tg_alloc_buddy.adb (line 140)

[procedure] procedure Lemma_Alloc_Disjoint

lib-ada/tg_alloc_buddy.adb (line 149)

[procedure] procedure Lemma_No_Double_Free

lib-ada/tg_comm_security.adb (line 12)

[function] function Route_Allowed (From, To : Layer) return Boolean is

lib-ada/tg_comm_security.adb (line 23)

[function] function Required_Right (O : Opcode) return Rights_Mask is

lib-ada/tg_comm_security.adb (line 48)

[function] function Required_Type (O : Opcode) return Type_Req is

lib-ada/tg_comm_security.adb (line 60)

[function] function Rights_Of (T : Cap_Table; C : Natural) return Rights_Mask is

lib-ada/tg_comm_security.adb (line 65)

[function] function Type_Of (T : Cap_Table; C : Natural) return Object_Type is

lib-ada/tg_comm_security.adb (line 70)

[function] function Authorize (T : Cap_Table; M : Msg) return Verdict is

lib-ada/tg_comm_security.adb (line 88)

[procedure] procedure Lemma_Empty_Table_Denies_All (M : Msg) is

lib-ada/tg_comm_security.adb (line 96)

[procedure] procedure Lemma_Revocation_Monotonic
